EDUCATION

Far Eastern University - Alabang
BS Information Technology, Web and Mobile Applications
Expected graduation: September 2027

SKILLS

Languages
Python · TypeScript · JavaScript · Java · Kotlin · Dart · C++ · Luau · PHP

Web and mobile
React · Vue · Node.js · Tailwind · FastAPI · Flutter · three.js · GSAP · Firebase

AI and machine learning
TensorFlow · OpenCV · MediaPipe · Gemini API

Data, cloud and design
PostgreSQL · SQLite · Redis · Docker · Cloud Run · Linux · Git · Figma · Blender

CERTIFICATIONS

Cisco CyberOps Associate
July 2026

Cisco Linux Essentials
November 2025

IT Specialist: Networking
Certiport, March 2025

About me

IT student at FEU Alabang focused on web and mobile development, system design, UI/UX design and machine learning. I learn by building real projects, from a capstone platform rated **4.89/5** to a trip planner I built and deployed on my own. Looking for a frontend or full-stack internship.

Experience

Capstone Project Developer & Researcher

Baylo, FEU Alabang capstone, 4-person team

- Built the web platform and backend on my own while three teammates built the mobile app: FastAPI with 9 route modules, a 13-table PostgreSQL database, and a React, TypeScript and Tailwind frontend.
- Connected web and mobile through a shared backend and Firebase, so accounts, listings, chat and notifications match on both.
- Added Gemini for item valuation, listing screening and trade matching; deployed on Google Cloud Run with Docker.
- Led the ISO/IEC 25010 evaluation: 100 respondents rated the platform 4.89/5.

UI/UX Designer & Gameplay Scripter

CoreStudio, Roblox game team, 2026

- Designed the game's UI/UX and wrote gameplay scripts in Luau.
- Built a server-authoritative anti-exploit system with an admin dashboard, saved bans, Discord webhook alerts and an auto-kick and auto-ban strike system.

Server Admin & Plugin Developer

BattleAsya Minecraft server, 2019 to 2022

- Helped run a server with about 14,000 players and up to 5,000 online at once.
- Built Java plugins on the Spigot API, including a report and ticket system that opens Discord tickets through a JDA and DiscordSRV bot. The server still uses it.

Projects

Lakbay Lokal

Trip planner for the Philippines, live. Python, FastAPI, SQLite, Gemini API, Leaflet

- Turns where a traveller is staying into a timed day of local stops, chosen from about 220 real places by budget, group, opening hours and interests.
- Gemini only rewords stored facts and never invents a place; includes a rainy-day swap, maps, exports and an offline day guide.

Wildwood Farm & Wildwood Site

3D browser game and its website. three.js, GSAP, JavaScript

- A 3D game with animal taming, farming, fishing, cooking and night wolf raids, plus a website with a 3D forest scene, field guide and world map.
